**MARK SCHEME for the October/November 2009 question paper  
for the guidance of teachers**

**9701 CHEMISTRY**

**9701/41**

Paper 41 (A2 Structured Questions),  
maximum raw mark 100

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

- CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the October/November 2009 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

- (iii)  $n(\text{Sn}^{2+}) = 0.02 \times 13.5/1000 \times 5/2 = \mathbf{6.75 \times 10^{-4}\text{ mol}}$  use of the 5/2 ratio [1]  
correct rest of working [1]  
 $n(\text{Sn}^{2+}) = 0.02 \times 20.3/1000 \times 5/2 = \mathbf{1.02 \times 10^{-3}\text{ mol}}$  [1]

 $\therefore$  ratio =  $6.75/3.45 = 1.96:1 \approx \mathbf{2:1}$   
 $\therefore$  formula is  $2\text{SnO} + \text{SnO}_2 \Rightarrow \mathbf{\text{Sn}_3\text{O}_4}$  (cond<sup>l</sup> on calculation, but allow ecf) [1]  
**[8]**
